

**Federal OSHA and the Curtis OSHA compliance program requires all PPE to be cleaned before employees perform inspections and/or repairs. If a soil transfer test indicates the presence of contaminants, a cleaning charge will be added to the service order.*

Curtis does not EVER knowingly accept gear for cleaning, inspection or repair that is suspected of exposure to certain contaminants, including but not limited to CBRN Terrorism Agents, Magnesium, Liquid PCBs, Fentanyl or Carfentanil, and Ebola. If uncertain whether Curtis is able to accept your gear, please contact your nearest Curtis service facility.
